

Product Data Sheet

Product Datasheet

5FO Oxygen CiTiceL®

Document Purpose

The purpose of this document is to present the performance specification of the 5FO oxygen sensor.

This document should be used in conjunction with Operating Principles OP02 and the Product Safety Datasheet PSDS 4.

The data provided in this document are valid at 20°C, 50% RH and 1013 mBar for 3 months from the date of sensor manufacture. For guidance on sensor performance outside of these limits, please refer to Operating Principles OP02.

Output signal can drift below the lower limit over time. For guidance on the safe use of the sensor, please refer to Operating Principles OP02.

Product Data Sheet

Key Features and Benefits

- · Reliably meets stated life
- Superior environmental performance

Technical Specifications

MEASUREMENT

Technology | Electrochemical

Measurement Range | 0-25% vol. O₂

Maximum Overload | 30% vol. O₂

Output Signal* | 0.41 ± 0.05 mA in Air

Response Time (T95)*

me (T95)* | <20 Seconds
Linearity | Can be considered linear in

many cases.

See Operating Principles (OP-02) for further details.

ELECTRICAL

Maximum Load Resistor | 100 Ω

MECHANICAL

Weight | 44 g Orientation Sensitivity | None

ENVIRONMENTAL

Operating Temperature Range
Recommended Storage Temp
Temperature Coefficient
Operating Pressure Range
Pressure Coefficient
Operating Humidity Range

-20°C to +45°C
0°C to 20°C
0.2% signal/°C
Atmospheric ± 10%
<0.02% signal/mbar
0 to 99%rH non-condensing

LIFETIME

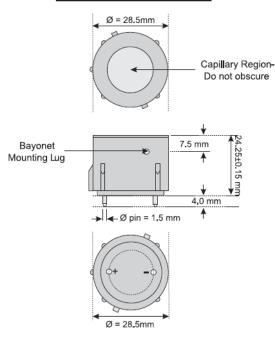

Long Term Output Drift* | <5% signal/year

Expected Operating Life | 2 years in air

Storage Life | 6 months in original packaging

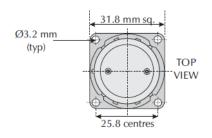

* Specifications are valid at 20°C, 50% RH and 1013 mBar, using City Technology recommended circuitry. Performance characteristics outline the performance of sensors supplied within the first 3 months. Output signal can drift below the lower limit over time.

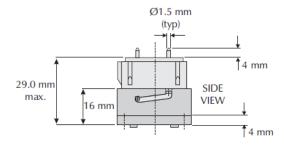

Product Dimensions

Two pins on 17.0 mm PCD

With Bayonet Fitting

All dimensions in mm.

All tolerances ±0.15 mm unless otherwise stated

IMPORTANT NOTE: Connection should be made via PCB sockets only. Soldering to the pins will seriously damage your sensor and invalidate the warranty.

Product Data Sheet

Poisons

CiTiceLs are designed for operation in a wide range of environments and harsh conditions. However it is important that exposure to high concentrations of solvent vapours is avoided, both during storage, fitting into instruments, and operation. When using sensors with printed circuit boards (PCBs), degreasing agents should be used before the sensor is fitted. Do not glue directly on or near the CiTiceL as the solvent may cause crazing of the plastic.

Cross Sensitivity Data

Toxic gases at TLV levels will have no cross-sensitivity effect on Oxygen CiTiceLs. At very high levels (i.e. percent levels), highly oxidising gases (e.g. ozone, chlorine) will interfere to the extent of their oxygen equivalent, but most other commonly occurring gases will have no effect.

Gas	Test Concentration	Balance	%O ₂ Equivalent
Hydrocarbons	100%	NA	0
Methane, CH ₄	100%	NA	0
Hydrogen, H ₂	100%	NA	< -2
Carbon Monoxide. CO	20%	Nitrogen	< -0.5

SAFETY NOTE

This sensor is designed to be used in safety critical applications. To ensure that the sensor and/or instrument in which it is used, are operating properly, it is a requirement that the function of the device is confirmed by exposure to target gas (bump check) before each use of the sensor and/or instrument. Failure to carry out such tests may jeopardize the safety of people and property.

Every effort has been made to ensure the accuracy of this document at the time of printing. In accordance with the company's policy of continued product improvement City Technology Limited reserves the right to make product changes without notice. The products are always subject to a programme of improvement and testing which may result in some changes in the characteristics quoted. As the products may be used by the client in circumstances beyond the knowledge and control of City Technology Limited, we cannot give any warranty as to the relevance of these particulars to an application. It is the clients' responsibility to carry out the necessary tests to determine the usefulness of the products and to ensure their safety of operation in a particular application.
